Art Unit: 2862

1. The Fischer '286 patent qualifies as prior art under 35 U.S.C. 103 since the publication date is more than one year prior to the filing date of the instant application.
2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 31-36 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nakijima et al. in view of Fischer, of record.

Nakijima discloses all of the claimed subject matter, except for the hemispherical placement dome, the casting composition and the lateral slit. Fischer teaches using a hemispherical placement dome. It would have been obvious to use a placement dome as claimed with the device of Nakijima in view of the teaching of Fischer. The casting composition and the lateral slit are considered obvious design considerations since they are old and known in the art.

4. Claims 21-30, 42 and 43 are allowed.
5. Claims 37-41 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
